

!!! IMPORTANT!!!

Wireless LED Traffic Sign Installation

1) Complete standard mounting of the sign as noted in enclosed instructions.....

EXCLUDING SOLAR PANELS!!!!

2) Mount & connect push button activation switch to sign.

3) Connect antenna to sign casing at “Antenna Connection” location (if not connected already)

4) Power on sign as per standard mounting instructions

5) Signs should sync to each other upon activation. (If they do not sync...see #6)

6) a) Turn off all signs

b) Power on all signs

c) Position personnel at each sign

d) Simultaneously press all activation buttons

Signs will sync after they time out.

7) Test all signs for proper activation / installation

8) **Install Solar Panels** with sign powered **“ON”** and functional

Sync time could be as long as **10** minutes.

The signs will continue to flash until they sync together.
